Z scale models' list

General info about my models' list

My scale models are based on a completely artisanal process, aimed to the realization of small series productions or to dedicated orders on request. Due to the lack of time, I cannot maintain a proper e-commerce website but, periodically and when possible, I update and publish on my website a PDF list that summarizes all the available models.

About ordering

If interested in some model on my list or should have any other request, please write to raf@mrztrax.com, referring to the Art.n. of the chosen models and your shipping address.

Please consider that if you desire models currently not available, choose from the "List of so far produced models", I ask you to order a minimum of 5 of them (even not of the same type).

You can also ask me for completely new models, but obviously this involves higher costs due to the realization process of the new needed project.

After your request, you will be shortly contacted, with the confirmation of the availability of the chosen models and a quotation including the relative shipping cost.

Payment can be made either through PayPal or via wire transfer through the IBAN code.

About shipment

It is my care to offer to customers the lowest possible cost, also arranging the packaging needed for a safe shipping to you.

I normally propose two choices: Priority postal shipment or Express courier. The indicative cost, to destination in central Europe, varies between €5 and €20 (as of May 2024) but obviously it must be evaluated at the moment, knowing the ordered items (due both to quantity and to the fragility of some particular models) and the specific destination. Of course, worldwide shipping is possible.

Vehicles equipped with lighting system

The lighting system that comes with my models is based on the use of optical fibers. This allows you to obtain excellent results from an aesthetic point of view in terms of precision and control of the light beams, as well as allowing a wide variety and combination of colors emitted by the model. In fact, the standard LEDbox system provides two distinct sources for the colors white (for the front headlights) and red (for the rear position/brake lights). However, for example, an additional yellow light can be conveyed on the same optical fiber, thus reproducing the effect of the directional indicator, mixed with the normal white or red LED sources. These additional features may be taken into consideration depending on the specific customer's needs.

Installation is easy: you only need to practice a hole (diam.=2.5mm) through the support surface to bring the optical fibers to a particular device, called LEDbox, where the coupling between the optical fibers and the LED light sources takes place. By purchasing the models equipped with the lighting system, you will receive everything you need (LEDbox, LEDs circuit and resistors already soldered to a 12Vdc power supply - not included -, model's fixing clothespin, plastic washers and fixing screws).

(Übersetzung Google)

Allgemeine Informationen zur Liste meiner Modelle

Meine Maßstabsmodelle basieren auf einem vollständig handwerklichen Prozess, der auf die Realisierung kleiner Serienproduktionen oder auf Anfrage dedizierten Bestellungen abzielt. Aufgrund des zeitlichen Mangels kann ich eine ordnungsgemäße E-Commerce-Website nicht beibehalten, aber in regelmäßigen Abständen und wenn möglich, aktualisiere und veröffentliche ich auf meiner Website eine PDF-Liste, die alle verfügbaren Modelle zusammenfasst.

Über die Bestellung

Wenn Sie sich für ein Modell auf meiner Liste interessieren oder eine andere Anfrage haben sollten, schreiben Sie bitte an raf@mrvtrax.com unter Bezugnahme auf die Art.n. der ausgewählten Modelle und Ihrer Versandadresse.

Bitte beachten Sie, dass ich Sie aus der „List of so far produced models“ ausgewählten Modelle ausgewählt habe, ich bitte Sie, mindestens 5 davon zu bestellen (auch nicht vom gleichen Typ).

Sie können mich auch nach völlig neuen Modellen fragen, aber dies beinhaltet offensichtlich höhere Kosten aufgrund des Realisierungsprozesses des neuen benötigten Projekts.

Nach Ihrer Anfrage werden Sie in Kürze kontaktiert, mit der Bestätigung der Verfügbarkeit der ausgewählten Modelle und eines Angebots einschließlich der relativen Versandkosten.

Die Zahlung kann entweder über PayPal oder über die Überweisung über den IBAN -Code erfolgen.

Über Versand

Ich bin mir vorgestellt, den Kunden die niedrigstmöglichen Kosten anzubieten und auch die Verpackung zu ordnen, die für einen sicheren Versand für Sie erforderlich ist.

Normalerweise schlage ich zwei Möglichkeiten vor: vorrangige Postlieferung oder Express Courier. Die indikativen Kosten für das Ziel in Mitteleuropa variieren zwischen 5 und 20 € (ab Mai 2024), aber offensichtlich muss es im Moment bewertet werden, wobei die geordneten Elemente (aufgrund der Quantität und der Fragilität einiger bestimmter Modelle aufgrund der Fragilität einiger Modelle "bewertet werden müssen) und das spezifische Ziel. Natürlich ist der weltweite Versand möglich.

Mit Beleuchtungssystem ausgestattete Fahrzeuge

Das mit meinen Modellen gelieferte Beleuchtungssystem basiert auf der Verwendung optischer Fasern. Auf diese Weise können Sie hervorragende Ergebnisse aus ästhetischer Sicht in Bezug auf Präzision und Kontrolle der Lichtstrahlen erzielen sowie eine große Vielfalt und Kombination von Farben ermöglichen, die vom Modell emittiert werden. Tatsächlich bietet das Standard -LEDBOX -System zwei unterschiedliche Quellen für die weißen Farben (für die vorderen Scheinwerfer) und rot (für die hintere Position/Bremslichter). Beispielsweise kann jedoch ein zusätzliches gelbes Licht auf derselben optischen Faser übertragen werden, wodurch die Wirkung des Richtungsanzeigens reproduziert wird, gemischt mit den normalen weißen oder roten LED -Quellen. Diese zusätzlichen Merkmale können je nach den Bedürfnissen des Kunden berücksichtigt werden.

Die Installation ist einfach: Sie müssen nur ein Loch (Durchmesser. = 2,5 mm) durch die Stützoberfläche üben, um die optischen Fasern auf ein bestimmtes Gerät mit dem Namen LEDBox zu bringen, bei dem die Kopplung zwischen den optischen Fasern und den LED -Lichtquellen stattfindet. Durch den Kauf der mit dem Beleuchtungssystem ausgestatteten Modelle erhalten Sie alles, was Sie benötigen (LEDbox, LEDs -Schaltkreis und Widerstände, die bereits an eine 12Vdc -Netzteil gelötet wurden - nicht enthalten -, das Befestigungsgespräch des Modells, Plastikwaschmaschinen und die Befestigungsschrauben).

LIST OF SO FAR PRODUCED MODELS

- Alfa Romeo Giulia GTA [1972] (1)
- Alfa Romeo 33 Stradale [1967-69] (1+4)

Camper small roof pop-up (2)
Dropside flat van (1+2+3)
Dropside flat van - one side open (1+2)
Wooden dropside flat van (1+2)
Aerial platform (2)
Special Combo 2xCargo Puppenkönig (1+2+3)
Special Cargo + Duck (1+2+3)
- VW Typ2 T3 [1979-2002]:
Cargo (1+2+3)
Bus (1+2+3)
Camper (1+2+3)
- VW Golf I GTI [1974-83] (1)
- VW ID.BUZZ [2022-] (1+2+3)
- VW New Beetle [1997-2012] (1+2+3)

Notes:

All vehicles have glass surfaces (windshield and side/rear windows) reproduced with clear resin, enamel/acrylic coloring, custom made decals (type and number depending on specific model) and: (1) model can be prepared to be equipped with front/rear LED lights; (1a) with other light sources, like emergency light on the roof or similar; (2) one or more interior details like dashboard/steering wheel/front and rear seats/parcel shelf/etc.; (3) one or more shadowed figures visible through the windscreens and side/rear windows; (4) Alfa Romeo 33 Stradale has engine's air intakes visible through the rear window; (5) Rally special vehicle equipped with 10 light sources.

Anmerkungen:

Alle Fahrzeuge verfügen über Glasoberflächen (Windschutzscheibe und Seiten-/Heckscheiben), die mit klarem Harz reproduziert wurden, Emaille-/Acrylfarbe, individuell angefertigte Aufkleber (Art und Anzahl hängen vom jeweiligen Modell ab) und: (1) Das Modell kann für die Ausstattung mit Front-/Heckscheiben vorbereitet werden. LED-Rücklichter; (1a) mit anderen Lichtquellen, wie Notlicht auf dem Dach oder Ähnlichem; (2) ein oder mehrere Innendetails wie Armaturenbrett/Lenkrad/Vorder- und Rücksitze/Hutablage usw.; (3) eine oder mehrere schattige Figuren, die durch die Windschutzscheibe und die Seiten-/Heckscheiben sichtbar sind; (4) Beim Alfa Romeo 33 Stradale sind die Lufteinlässe des Motors durch die Heckscheibe sichtbar; (5) Rallye-Spezialfahrzeug, ausgestattet mit 10 Lichtquellen.
