## Z scale models' list

April, 19 - 2025

## General info about my models' list

My scale models are based on a completely artisanal process, aimed to the realization of small series productions or to dedicated orders on request. Due to the lack of time, I cannot maintain a proper e-commerce website but, periodically and when possible, I update and publish on my website a PDF list that summarizes all the available models.

## About ordering

If interested in some model on my list or should have any other request, please write to raf@mrztrax.com, referring to the Art.n. of the chosen models and your shipping address.

Please consider that if you desire models currently not available, choosen from the "List of so far produced models", I ask you to order a minimum of 5 of them (even not of the same type), otherwise I have to apply a small extra charge.

You can also ask me for completely new models, but obviously this involves higher costs due to the realization process of the new needed project.

After your request, you will be shortly contacted, with the confirmation of the availability of the chosen models and a quotation including the relative shipping cost.

Payment can be made either through PayPal or via wire transfer through the IBAN code.

## About shipment

It is my care to offer to customers the lowest possible cost, also arranging the packaging needed for a safe shipping to you.

I can offer different shipping system, depending on needs and, of course, costs. Mainly I propose three shipping services.

1) The cheapest is the **International Priority Mail**, starting from €5 to Zone 1 Countries and €6 to Zone 2 Countries. No tracking is available. Average waiting times ranges from 3 days within UE to 8 days to USA.

2) Especially when the value of the goods increases, I suggest the **Insured Shipping starting** from €13 to Zone 1 Countries and €14 to Zone 2 Countries. Tracked to destination.

3) **Express couriers** are best in case of high quantity/value/fragility of the shipped items. Prices fluctuate and now (Dec 24) they are about €20 to most European Countries and €32 to overseas destinations (USA) with no insurance (insurance is possible at variable cost), and of course it's tracked and should be safer and faster than 1) and 2).

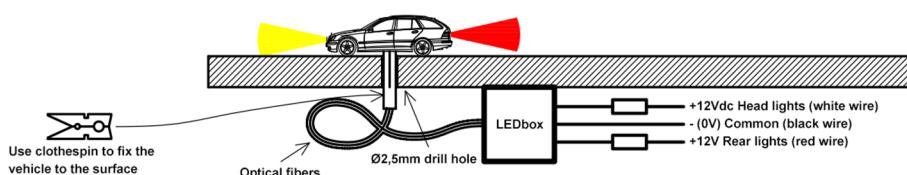

Please consider shown prices only as indicative. When placing an order, I'll check latest prices and then I let you choose which shipping system do you prefer.

By choosing the cheaper 1), the Customer waives insurance coverage on the goods purchased. In the event of loss, damage or delay in delivery of the package, the Seller will not be held responsible. The Customer therefore assumes all risks associated with this choice. However, consider that until now, I have a 100% success rate to European Countries and a 99% to Overseas Countries.

## Vehicles equipped with lighting system

The lighting system that comes with my models is based on the use of optical fibers. This allows you to obtain excellent results from an aesthetic point of view in terms of precision and control of the light beams, as well as allowing a wide variety and combination of colors emitted by the model. In fact, the standard LEDbox system provides two distinct sources for the colors white (for the front headlights) and red (for the rear position/brake lights). However, for example, an additional yellow light can be conveyed on the same optical fiber, thus reproducing the effect of the directional indicator, mixed with the normal white or red LED sources. These additional features may be taken into consideration depending on the specific customer's needs.

Installation is easy: you only need to practice a hole (diam.=2.5mm) through the support surface to bring the optical fibers to a particular device, called LEDbox, where the coupling between the optical fibers and the LED light sources takes place. By purchasing the models equipped with the lighting system, you will receive everything you need (LEDbox, LEDs circuit and resistors already soldered to a 12Vdc power supply - not included -, model's fixing clothespin, plastic washers and fixing screws).

## Allgemeine Informationen zur Liste meiner Modelle

Meine Maßstabsmodelle basieren auf einem vollständig handwerklichen Prozess, der auf die Realisierung kleiner Serienproduktionen oder auf Anfrage dedizierten Bestellungen abzielt. Aufgrund des zeitlichen Mangels kann ich eine ordnungsgemäße E-Commerce-Website nicht beibehalten, aber in regelmäßigen Abständen und wenn möglich, aktualisiere und veröffentlichte ich auf meiner Website eine PDF-Liste, die alle verfügbaren Modelle zusammenfasst.

## Über die Bestellung

Wenn Sie sich für ein Modell auf meiner Liste interessieren oder eine andere Anfrage haben sollten, schreiben Sie bitte an raf@mrvtrax.com unter Bezugnahme auf die Art.n. der ausgewählten Modelle und Ihrer Versandadresse.

Bitte beachten Sie: Wenn Sie derzeit nicht verfügbare Modelle aus der „Liste der bisher produzierten Modelle“ wünschen, muss ich Sie bitten, mindestens 5 davon (auch nicht vom gleichen Typ) zu bestellen, da ich Ihnen sonst einen geringen Aufpreis berechnen muss.

Sie können mich auch nach völlig neuen Modellen fragen, aber dies beinhaltet offensichtlich höhere Kosten aufgrund des Realisierungsprozesses des neuen benötigten Projekts.

Nach Ihrer Anfrage werden Sie in Kürze kontaktiert, mit der Bestätigung der Verfügbarkeit der ausgewählten Modelle und eines Angebots einschließlich der relativen Versandkosten.

Die Zahlung kann entweder über PayPal oder über die Überweisung über den IBAN -Code erfolgen.

## Über Versand

Es ist mir ein Anliegen, den Kunden die niedrigstmöglichen Kosten anzubieten und auch die Verpackung zu organisieren, die für einen sicheren Versand an Sie erforderlich ist.

Ich kann je nach Bedarf und natürlich Kosten verschiedene Versandsysteme anbieten. Hauptsächlich biete ich drei Versanddienste an.

1) Der günstigste ist die internationale Priority-Mail, die bei 5 € in Länder der Zone 1 und 6 € in Länder der Zone 2 beginnt. Es ist keine Sendungsverfolgung verfügbar. Die durchschnittlichen Wartezeiten reichen von 3 Tagen innerhalb der EU bis zu 8 Tagen in die USA.

2) Insbesondere wenn der Wert der Waren steigt, empfehle ich den versicherten Versand ab 13 € in Länder der Zone 1 und 14 € in Länder der Zone 2. Sendungsverfolgung bis zum Ziel.

3) Expresskuriere sind am besten geeignet, wenn die Menge/der Wert/die Zerbrechlichkeit der versendeten Artikel groß ist. Die Preise schwanken und liegen derzeit (24. Dezember) bei etwa 20 € in die meisten europäischen Länder und 32 € ins Ausland (USA) ohne Versicherung (Versicherung ist zu variablen Kosten möglich), und natürlich wird der Versand verfolgt und sollte sicherer und schneller sein als 1) und 2).

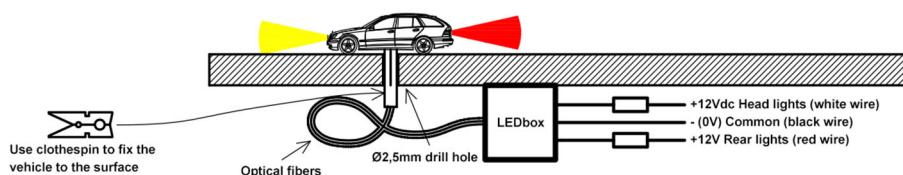

Bitte betrachten Sie die angezeigten Preise nur als Richtwerte. Wenn Sie eine Bestellung aufgeben, prüfe ich die neuesten Preise und lasse Sie dann wählen, welches Versandsystem Sie bevorzugen.

Mit der Wahl des günstigeren 1) verzichtet der Kunde auf den Versicherungsschutz für die gekauften Waren. Im Falle von Verlust, Beschädigung oder Lieferverzögerung des Pakets wird der Verkäufer nicht haftbar gemacht. Der Kunde übernimmt daher alle mit dieser Wahl verbundenen Risiken. Bedenken Sie jedoch, dass ich bisher eine Erfolgsquote von 100 % in europäische Länder und 99 % in Überseeländer habe.

## Mit Beleuchtungssystem ausgestattete Fahrzeuge

Das mit meinen Modellen gelieferte Beleuchtungssystem basiert auf der Verwendung optischer Fasern. Auf diese Weise können Sie hervorragende Ergebnisse aus ästhetischer Sicht in Bezug auf Präzision und Kontrolle der Lichtstrahlen erzielen sowie eine große Vielfalt und Kombination von Farben ermöglichen, die vom Modell emittiert werden. Tatsächlich bietet das Standard -LEDBox -System zwei unterschiedliche Quellen für die weißen Farben (für die vorderen Scheinwerfer) und rot (für die hintere Position/Bremslichter). Beispielsweise kann jedoch ein zusätzliches gelbes Licht auf derselben optischen Faser übertragen werden, wodurch die Wirkung des Richtungsanzeigens reproduziert wird, gemischt mit den normalen weißen oder roten LED -Quellen. Diese zusätzlichen Merkmale können je nach den Bedürfnissen des Kunden berücksichtigt werden.

Die Installation ist einfach: Sie müssen nur ein Loch (Durchmesser. = 2,5 mm) durch die Stützoberfläche üben, um die optischen Fasern auf ein bestimmtes Gerät mit dem Namen LEDBox zu bringen, bei dem die Kopplung zwischen den optischen Fasern und den LED -Lichtquellen stattfindet. Durch den Kauf der mit dem Beleuchtungssystem ausgestatteten Modelle erhalten Sie alles, was Sie benötigen (LEDbox, LEDs -Schaltkreis und Widerstände, die bereits an eine 12Vdc -Netzteil gelötet wurden - nicht enthalten -, das Befestigungsgespräch des Modells, Plastikwaschmaschinen und die Befestigungsschrauben).
